Software for the Macintosh™

3 1/2" Diskette

UNSCRAMBLE

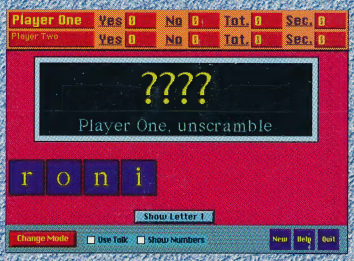
By David Bagno

Unscramble is an exciting word game for one or two players. This program offers a challenging and creative way for children to learn spelling and a host of other important phonic skills.

This program also introduces a new concept to the two-player bee games: It is now possible to have two players of different ages and levels play against each other! This game has been designed to allow players to draw from different banks of questions. This means the Player One can use words from Bank A, which may be less challenging, and that Player Two can use words from Bank B, which may be more difficult!



Users are able to add their own personalized words to the question banks!

Features Include:

- Real computer speech synthesis (the computer actually talks to your child)!
- Vivid Graphics and sound effects.
- 1 or 2 players with separate editable lists for 2 players of different ages.
- Complete user control over lists of words. Parents can monitor the lists of words.
- Parents can type their child's spelling list from school into the program, providing the child with a way to have fun while learning.
- Supports ALL monitor sizes by adjusting objects' size.
- Parents can edit the comments to personalize the program for the child or create their own set of reinforcing comments.

System Requirements:
This version will work in any monitor bit depth, though it is optimized for 256 colors or Black and White. It requires 1300K free RAM for Color and 800K for BW. Monitors larger than 16-inch may need more. Needs system software version 7.0 or higher and Speech Manager for full functioning speech. Will work with any system over 6.0.4 with no speech capabilities.

DR. MACINTO

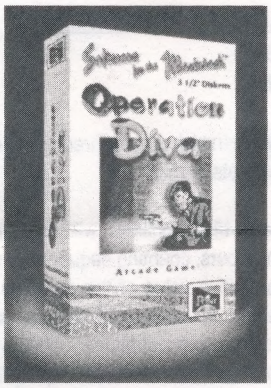
Product # 11531

Dr. Macinto takes the excitement of Tetris™ to new levels!
Biological viruses are running amok!

The fate of the world is in your hands as these biological nightmares threaten all of humanity!!

Your goal is to remove all the viruses, using special antidote pills that drop from the center of the vial. The virus blocks can be removed by arranging the antidotes in matching color sequences horizontally, vertically, or diagonally.

Only $9.95



OPERATION DIVA

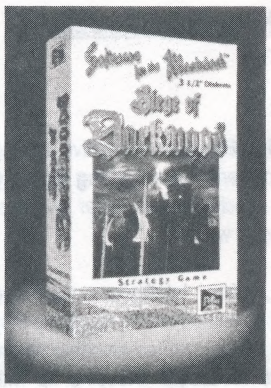
Product # 10232

Challenge Yourself With This Exciting and Fast-Paced Adventure Game!

Your name is Rick Sorril, a member of the strategic fighting unit for the Council of Planets. One of the council members revealed to you that an alien race known as the Xoren had broken into his home and kidnapped his daughter.

Your mission is to rescue the council member's daughter at ANY cost . The Xoren have developed droid soldiers, making them one of the most dangerous enemies you have ever faced.

Only $9.95



SIEGE OF DARKWOOD

Product # 10231

Your journey continues with **enhanced action and excitement** in the thrilling sequel to the original strategy game, Darkwood!

The city of Darkwood is once again under attack from the evil being Torque. Defend the city and it's inhabitants by battling the countless enemy hordes lurking in the shadowy mist. You (Derek, Captain of the Guard) are selected as **the only hope** the city of Darkwood has in its defense! With valor (and limited resources), **you must defend the city against many different foul creatures.**

Only $9.95

SPACE CRAZED

Product # 11631

Your skills are pressed to the limit as you eliminate the dreaded **Space Junkies** - a mutant race from a distant planet, whose sole mission is to conquer your species! Your ship is equipped with advanced weaponry to deal with this mission. However, there is a flaw in your armament! Your laser cannon is prone to over-heating!

Space Crazed is a ***Fast Action*** arcade game based on the classic shoot 'em ups from the past mixed with **New Animation Technologies** of today.

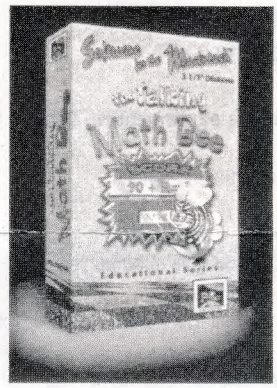
FIRST LESSONS IN MATH

Product # 11831
For Ages: 3 to 6

First Lessons in Math introduces children 3 and up to numbers and concepts in math.

With **First Lessons In Math**, children will learn: the look and sound of numbers, counting sequentially up and down, the quantitative value of the numbers 1 through 10, calculating the number of objects, and real numeric and subtraction equations. This program solidifies important math concepts rapidly by bringing strong visual and audio sensory aids to the math learning process.

Only $9.95



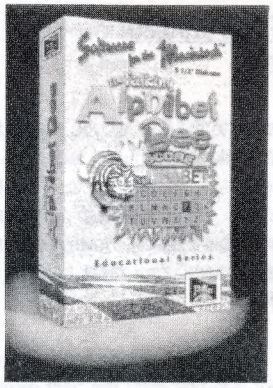
THE TALKING MATH BEE

Product # 11832
For Ages: 3 to 12

The Math Bee is an interactive math game for 1 or 2 players The Talking Math Teacher will ask each player to solve a math equation. The competition is exciting as kids compete against the clock for the highest score and hear the rebuttals of the Talking Math Teacher!

Parents and teachers can adjust the equations to any level, working with numbers ranging from 1 to 120,000. Kids' math grades will improve dramatically in Addition, Subtraction, Multiplication and Division.

Only $9.95



THE TALKING ALPHABET BEE

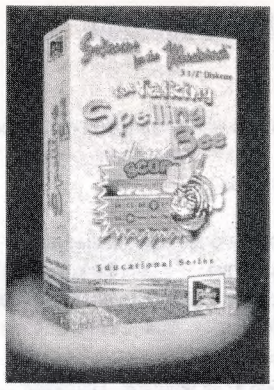
Product # 11834
For Ages: 3 to 8

The Talking Alphabet Bee is a talking game for one or two players that even 3 year olds can play! Kids will have lots of fun as they quickly learn the sound and look of letters and words.

The Talking Alphabet Bee lets you:

- Switch between upper and lower case letters.
- Type or paste in your own words.
- Have complete control over the range of letters.
- Concentrate on 1, 2, or 3 letters at a time.

Only $9.95



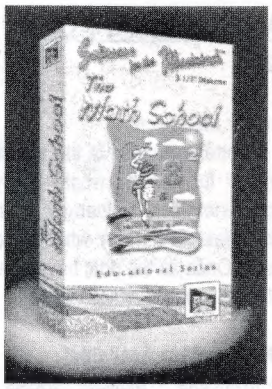
THE TALKING SPELLING BEE

Product # 11835
For Ages: 3 to 12

The Talking Spelling Bee is an interactive spelling game for 1 or 2 players. **The Talking Spelling Bee** teacher will coach children letter by letter through the spelling of words.

Features include: Artificial Intelligence-monitoring all letters entered so children will be taught as they go along. Click on the big colored alphabet blocks and get immediate feedback. Keeping up with school spelling lists is a breeze. Parents and teachers can add their own words to the child's spelling list.

Only $9.95



THE MATH SCHOOL

Product # 11833
For Grades: 1 to 12

The Math School is one of the most powerful and diverse math teaching programs available for the Macintosh. The ability to set and design math equations enables teachers to use this program in grade levels 1 through 12. The Math School articulately asks students to solve math equations. Choose between multiple choice or fill-in-the-blank answers! Teachers can even program the spoken dialog, adding personalized reinforcement!

This program has a very powerful printable Test-Maker feature. There is also a Grade-Keeping system that cannot be accessed by the students.

Only $9.95
